CIA reps reply: WC chaps ag KB neg serious consideration, since exposure of CIA role in vaccination wd have serious consequences, esp if current use, in light of current interest (65-Stat 6969) in prosc.

ACSI wd have to demonstrate "unique info of significant importance under secure opnl conditions" before CIA wd undertake work. Suggests using existing channel (Meret A-G.) to clarify his value.

"Generally negative reaction to recontacting KB w/o a clear understanding of that potential gain outweighed the manifest risks" was understood + accepted by ACSI officers."
